

NEW MOTOROLA FIXED WIRELESS PHONE ENABLES SEAMLESS COMMUNICATIONS EXPERIENCE AT HOME

Motorola and Brightstar deliver the Motorola FX2000xg, now available in select Latin America markets.

MIAMI, FL – 19 September 2006 – Motorola, Inc. (NYSE:MOT) today announced the availability of the Motorola FX2000xg GSM fixed wireless phone for the Latin America market. Rich in features, the phone enables consumers to communicate and maintain a fixed wireless phone for their office or home without the need for a land line.

Following in the footsteps of the highly successful Motorola FX1900xg phone, the Motorola FX2000xg is sleeker and smaller than its predecessor and adds key features such as polyphonic ring tones, speaker phone, and multi-caller functionality including call waiting and conference call capabilities. To enable the end user to dial and read information on the display in low light situations, the phone was uniquely designed to have blue LED background light for its large LCD graphics display and individual numerical and function blue LED background keys.

Motorola and Brightstar have aligned to deliver the new Motorola FX2000xg, leveraging Motorola's design, brand, and development expertise and Brightstar's manufacturing, distribution, and channel leadership.

"Designed to connect consumers, the new Motorola FX2000xg delivers an enhanced fixed wireless communications experience at an affordable price," said Jaime Narea, vice president, fixed wireless devices division, Brightstar. "With the Motorola FX2000xg, we're taking fixed wireless communications to a whole new level in Latin America."

Motorola FX2000xg Key Features

- Dial Tone
- On hook dialing
- Intuitive user interface with graphical LCD
- DTMF sending while in-call
- One touch dialing to voicemail
